

Data Communication BLM3051

Furkan ÇAKMAK

1

Lecture Information Form - Weekly Subjects

BLM3051
Data
Communication
Week 2

| Week | Date | Subjects |
|------|------------|---|
| 1 | 04.10.2022 | Introduction to Data Communication Standards Used on Data Communication, Architectural models |
| 2 | 11.10.2022 | OSI Reference Model , Layers and Their Functions |
| 3 | 18.10.2022 | Signaling and Signal Encoding |
| 4 | 25.10.2022 | Parallel and Serial Transmission, Communication Media and Their Technical Specs., Multiplexing (TDM, FDM) |
| 5 | 01.11.2022 | Error Detection and Error Correction Techniques |
| 6 | 08.11.2022 | Data Link Control Techniques, Flow Control |
| 7 | 15.11.2022 | Asynchronous and Synchronous Data Link Protocols (BSC, HDLC) |
| 8 | 22.11.2022 | 1. Vize Haftası |
| 9 | 29.11.2022 | LAN Technologies Continued, IEEE 802.4, 802.5, 802.11 |
| 10 | 06.12.2022 | Connectionless and Connection Oriented Services, Switching |
| 11 | 13.12.2022 | Wide Area Networking Technologies (X.25, ISDN, FR, ATM, xDSL..) |
| 12 | 20.12.2022 | Communications Equipment's, TCP/IP Model, Security Issues |
| 13 | 27.12.2022 | Research Presentation 1 |
| 14 | 03.01.2022 | Research Presentation 2 |

Furkan ÇAKMAK

2

OSI Reference Model

BLM3051
Data
Communication
Week 2

- ISO - 1984
- De Jure
- Features
 - Open
 - Flexible
 - Robust
 - Interoperable
 - Easy to explain
 - Easy to understand
- 7-layers
- Never applied / Ideal Model

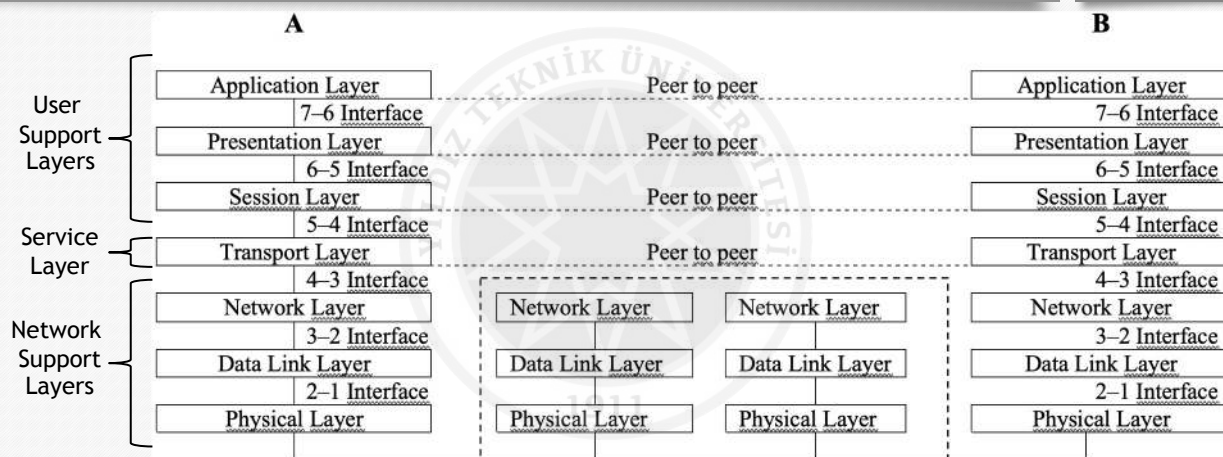

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

3

OSI Reference Model - Con't

BLM3051
Data
Communication
Week 2

Furkan Çakmak

4

OSI Reference Model - Con't

BLM3051
Data
Communication
Week 2

- Each layers add a **header** package.
- Only second layer (Data link) add a **trailer** end of the package.
 - Error control
- Encapsulation

Furkan Çakmak

5

OSI - Physical Layer

BLM3051
Data
Communication
Week 2

- Responsible for **transmitting bit arrays** between peers.
- General functions of the Physical Layer;
 - Electromechanic
 - **Direction** of the package
 - Determining **magnitudes** of signals
 - Amplitude, Wavelength, Frequency
 - **Initiation** and **termination** of the physical connection.

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

6

OSI - Data Link Layer

BLM3051
Data
Communication
Week 2

- Extract/divide **frames** from the messages.
- Send frames to receiver side **in an order**.
- Using acknowledgment (ACK) info;
 - In case of an **error**,
 - In case of **not receive** the package,
 - **Re-transmission**
- Add **header** and **trailer** data to frames.
 - To determine the **starting and ending points** of the frame.
- Header includes;
 - Sender address,
 - Receiver address,
 - Order info
- Trailer includes;
 - A code (to check errors)

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

7

OSI - Data Link Layer - Con't

BLM3051
Data
Communication
Week 2

- General functions of the Data Link Layer;
 - Node to node **error free** delivery
 - Addressing (in header part)
 - MAC Address
 - Access Control
 - Flow Control
 - Error Handling
 - Synchronization
- In Local Area Network (LAN)
 - DLL divides into 2 different layers;
 - LLC (Logical Link Control)
 - MAC (Media Access Control)
- Communication at the data link layer is in the **same network**.

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

8

OSI - Network Layer

BLM3051
Data
Communication
Week 2

- Network layer is responsible for;
 - **Efficiently and accurately** forwarding the packet
 - From source to destination **over different network links**.
- Communication at the network layer is in the **different network**
 - **Router (3rd level devices)**
- **Switching**
 - Connection oriented
 - like telephone infrastructure system
- **Routing**
 - **Determining the path between sender and receiver**
 - **Connectionless**
 - Delivering packages
 - In DLL, data transfer occurs between nodes

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

9

OSI - Network Layer - Con't

BLM3051
Data
Communication
Week 2

- Address must be different from DLL's addresses.
 - Logical Address
- **Data transfer occurs between the source and the destination.**
- General functions of the Network Layer;
 - **Source to Destination packet delivery**
 - **Logical addressing**
 - **Routing**
 - **Address transformation**
 - Between logical and physical addresses
 - **Multiplexing**
 - Multiple physical connections on a single newtwork connection at the same time

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

10

OSI - Transport Layer

BLM3051
Data
Communication

Week 2

- Responsible for the **transmission of data**
 - from source to destination
- Network layer responsible for delivering data
- Transport layer responsible for delivering packages
 - data = package[]
- Data transmission is between applications, not computers.
- An additional addressing mechanism is required
 - to **distinguish the applications from each other.**
 - **Service Access Point - SAP**
 - Ports, Sockets
- Transport layer **divides the incoming information into pieces (*segment*)** in sizes supported by the infrastructure.
 - Segmentation
 - Sequence number
 - Re-assembly

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

11

OSI - Transport Layer - Con't

BLM3051
Data
Communication

Week 2

- There are **two types** of services.
 - **Connectionless**
 - Like post services
 - **Connection oriented**
 - Like phone services
 - Establish connection
 - Data transmission
 - Terminate connection
 - **More control over the data to be transferred**
- General functions of the Transport Layer;
 - Data transmission between source and destination nodes
 - To **provide data flow** between applications with the help of service points
 - **Segmentation & Re-assembling**
 - Ensuring connection control
 - Connectionless | Connection oriented

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

12

OSI - Session Layer

BLM3051
Data
Communication

Week 2

- This layer is responsible for **ensuring continuity**.
 - Synchronization
- Choosing connection type
 - Half-duplex
 - Duplex
- Session data transferring
 - Password
 - Logon verification
- **Sessions can be split into sub-sessions to ensure the reliability of the connection**
- Sub-sessions are provided with **checkpoint** information.

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

13

OSI - Session Layer - Con't

BLM3051
Data
Communication

Week 2

- General functions of the Session Layer;
 - **Managing the session**
 - **Communication control**
 - if it is half-duplex
 - **Ensuring synchronization**
 - **Gracefull close**

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

14

OSI - Presentation Layer

BLM3051
Data
Communication

Week 2

- General functions of the Presentation Layer;
 - Provides interoperability by eliminating possible differences in information representation between devices during data communication
 - Abstract data syntax
 - Encryption & Decryption
 - Compression & Decompression

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

15

OSI - Application Layer

BLM3051
Data
Communication

Week 2

- User Interfaces
 - Electronical mail (e-mail)
 - File transferring
 - Remote desktop control
 - Internet explorer
 - vb.

| | |
|---|--------------------|
| 7 | Application Layer |
| 6 | Presentation Layer |
| 5 | Session Layer |
| 4 | Transport Layer |
| 3 | Network Layer |
| 2 | Data Link Layer |
| 1 | Physical Layer |

Furkan Çakmak

16

Other Network Models

BLM3051
Data
Communication
Week 2

| OSI Modeli | | TCP/IP Modeli | DNA | |
|-------------------|--|-------------------|-------------------|--------|
| Uygulama Katmanı | | Uygulama Katmanı | Ağ Uygulama | |
| Sunu Katmanı | | | Son Kullanıcı | |
| Oturum Katmanı | | Taşıma Katmanı | | Oturum |
| Taşıma Katmanı | | | Ağ Servisleri | |
| Ağ Katmanı | | Internet Katmanı | Taşıma Katmanı | |
| Veri Bağı Katmanı | | Ağ Erişim Katmanı | Veri Bağı Katmanı | |
| Fiziksel Katman | | | Fiziksel Katmanı | |

Furkan Çakmak

17

Thank you for your listening.
